

LEADER STOP

FIRE BLANKET

THE IDEAL FIRE BLANKET TO EXTINGUISH INCIPIENT FIRE

■ QUICK ISOLATION

Prevents total ignition and spread of fire to surrounding facilities while waiting for firefighters.

■ EASY HANDLING

The blanket is easy to handle by two people even with gloves

■ SMOKE REDUCTION

The purpose of the blanket is to extinguish the fire by depriving it of oxygen but also to reduce smoke fumes and thus avoid accidents

■ MULTI-APPLICATION

Suitable for several applications: cars, motorcycle, metal containers, industrial machinery fire...

■ LITHIUM-ION BATTERY

The LEADER STOP is usable on electric vehicle fire (car, motorcycle, scooter,...) and allows to delay until the arrival of emergency services.

The LEADER STOP is a large-format fire blanket designed to prevent an incipient car fire, allowing rapid intervention to avoid total embrasure and spread of the fire. It allows to intervene quickly and will be ideally placed near high-risk areas with high vehicle concentration (parking lots, car ferries, motorway tolls, car dealers...)

● ADDITIONAL EQUIPMENT :

- Explicit marking
- Detailed instructions for use
- Pairs of glove (x2) to protect users during installation
- An easily identifiable storage box (option only)
- A transportation bag (contact us for an inquiry)

CHARACTERISTICS

LEADER STOP

Materials	Glass fiber with polyurethane coating
Fire resistance	600°C – 1000°C (long term) 1600°C (short term)
Weight	25 kg
Dimensions	6x8 m (48 m ²)
Reusability	Up to 15 utilisations (tested on various types of fire from an incipient fire to a fully developed one)
Fire classification	M0
Storage box dimensions	H 83 x l 33 x P 33 cm

USE CASES

Usage for trained people:

For an incipient fire, to wait for the arrival of firefighters

Usage for firefighters:

For well to fully developed fire with the proper equipment only

● **REDUCED COST OF OWNERSHIP :**

Requires no maintenance or servicing.

● **INSTRUCTIONS FOR USE :**

When used by trained personnel, do not act alone (two persons are required) and use flame-retardant gloves.

Position the blanket to cut off oxygen supply and prevent total ignition.

Once properly positioned do not remove or touch the fire blanket and wait for firefighters to arrive.
