

Style 845-BC

- Rugged, brass construction for corrosion resistance.
- Combination pattern, master nozzle with selectable flow settings.
- Combination of straight stream and variable fog patterns.
- Flow is adjusted by a simple press-turn motion of the outer spring loaded baffle and rotating to the laser etched position for desired flow.
- Change pattern from straight stream to fog via an easy turn of the control bar.
- Excellent straight stream performance and a wide, dense, fully adjustable for pattern.
- Spinning teeth for a wider water curtain.
- Ideal for attachment to both portable and stationary monitors.

Compatible Protek Monitors
